

# Activating notifications for new fundraising campaigns

Under Settings > Fundraising Campaign Tool > Community Management You can create **automatic assignments**, for example if a new fundraising campaign was created. The assignments are created in the system without user assignment.

Optionally, you can also select a user whom the assignment is directly assigned. With this setting the user will additionally be informed of a new assignment **by e-mail** .

Please note that Fundraising Campaign Tools are not available in all FundraisingBoxes. For more information, please see our [prices page](#).
